- Redux

### Backend Technologies:

- Express JS
- Django
- Python

### Database Systems:

- Redis DB
- MySQL
- PreSQL

### Cloud & Deployment:

- Digital Ocean
- Docker

### E-commerce Integration:

- Stripe
- Klarna

### Form Libraries:

- Formik

Hello,

Currently based in Gothenburg, Sweden, I am a web developer with a primary focus on frontend development. Open to relocation for the right opportunity, I thrive in collaborative environments and am equally adept at working independently. My proactive problem-solving approach empowers me to actively seek solutions when faced with challenges.

As an experienced full-stack web developer, I specialize in crafting dynamic and user-friendly interfaces using modern frameworks such as React, Vue, Svelte, and JavaScript. Proficient in styling tools like Tailwind, Bootstrap, and Material UI, I ensure the creation of aesthetically pleasing web pages.

In the backend, my skills in Python, Node.js, coupled with experience in ExpressJS and other frameworks like Django, allow me to navigate diverse database systems. I specialize in constructing tailored queries for PostgreSQL, MySQL, Maria DB, and Redis, enabling efficient data optimization and management.

In the realm of system support, I leverage my valuable experience to adeptly collaborate with third-party systems, specializing in responsive web development to ensure seamless user experiences across various devices. Furthermore, my comprehensive understanding of E-commerce integration is demonstrated through successful implementations with payment gateways such as Stripe and Klarna systems.

I'm quite experienced with Strapi, a headless CMS and API, as well as WordPress, particularly with WooCommerce. I've worked on various projects using these tools, managing content and creating effective e-commerce solutions.

Venturing into machine learning, my proficiency in Python and exploration of PyTorch and tensors drive the development of advanced solutions for artificial intelligence AI.

As a bilingual professional fluent in English, French, Swedish, and Russian, I am confident in my ability to communicate effectively with clients and colleagues from diverse backgrounds.

Thank you for considering my application. I have attached my CV for your review and look forward to the opportunity to further discuss my qualifications with you in an interview.

Sincerely,

Kanan Garaisayev
