Dear,

I am writing to express my interest in the Front-End Developer. As a highly motivated and detail-oriented professional with two years of experience in Web development, I believe that my skills and qualifications make me an ideal candidate for this position.

I am currently working as a Front-End Developer at WorkPrecision, where I have been responsible for developing React TypeScript projects using Material UI and React Router. In this role, I have gained extensive experience in Front-End, which I believe would be highly applicable to the Front-End Developer. Specifically, I have experience in JavaScript, React JS, Svelte, Express JS & others, and have demonstrated a track record of success in to middle web developer in short time.

In addition to my work at WorkPrecision, I have also completed my education in Medieinstitutet Gothenburg Sweden, where I received my Web Developer in E-commerce certificate in 2022. During my time there, I gained expertise in front and backend development using HTML5, CSS3, JavaScript, React, Express, PHP, GIT, WordPress and SQL. I also have experience in system support and third party systems, responsive web development, and connection with E-commerce such as Stripe and Klarna systems.

As a bilingual professional fluent in English, French, Swedish and Russian, I am confident in my ability to communicate effectively with clients and colleagues from diverse backgrounds. I have a passion for IT domain and am committed to delivering high-quality results that exceed expectations.

Thank you for considering my application. I have attached my CV for your review, and I look forward to the opportunity to further discuss my qualifications with you in an interview.

Sincerely,

Kanan Garaisayev
